WCM2 PRINT

- Wirelessly print from macOS®, iOS®, Android®, and Windows® devices.

- Easy printing from tablet-based (iPad® or Android) photo booths and roamer booths.

- Printer and media are automatically identified by WCM2 Print.

- Print to single or multiple DNP printers.

- Perfect tool to enable printing at small to medium size events.

Easy Wireless Printing

The WCM2 Print is DNP's newest and easiest wireless printing device, allowing wireless printing from mobile devices (iPhone®, iPad, and Android devices), Windows PCs, and Mac® and direct printing using the WCM Print.
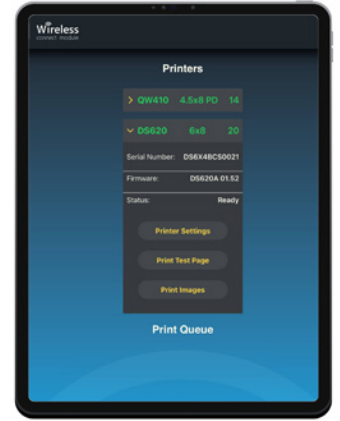

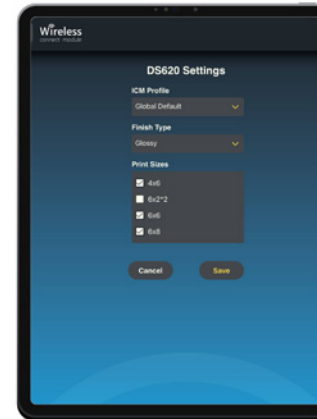

WCM Portal

The WCM Portal includes new admin controls that are easy to navigate. Set which print sizes are made available, manage WCM Print functions, and other settings to customize the user experience.
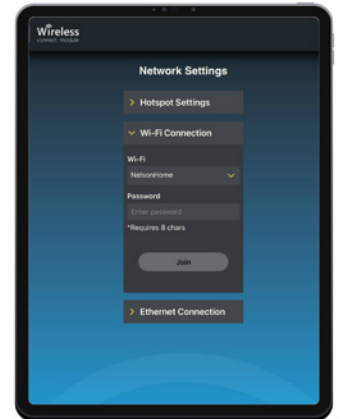

Shows connected printers & media count.

Drop down allows for easy change to printer settings.

Adjust print sizes, finish, and even ICM profiles.

Create Hotspot, connect to WiFi, or setup ethernet connection.

WiFi Hotspot

The WCM2 Print creates its own WiFi hotspot that allows wireless printing without the need for an internet connection.

Connects to Your Network

The WCM2 Print can connect to other networks via WiFi or ethernet to allow you to print as well as connect to social networks for uploads.

WCM Print

Allows pictures that are stored locally on the device to be selected using the WCM Print and sent directly to the printer.
