DNP
Photo Imaging

IDW500™

- ID Photo printing is quick, easy, and generates high profits.

- 3-year Advance Exchange (AE)* Warranty included with the printer!

- Each image biometrically checked.

- Designed for foreign and domestic passport and Visa requirements.

Generates High Profits

ID photo printing is one of the most profitable services a photo business can offer. Competitive media pricing allows for higher revenue potential and that means more profit for your business.
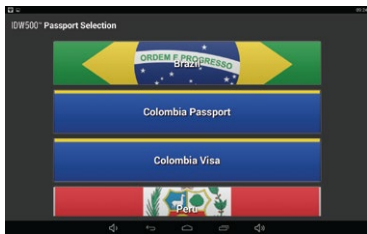

Biometric Verification

The IDW500 console checks every image against 8 biometric verifications, so each passport or Visa photo meets domestic and foreign requirements, thus eliminating rejections and unhappy customers.
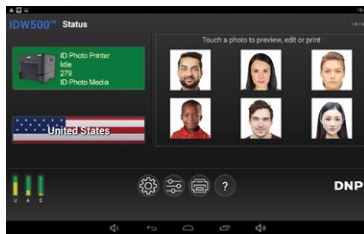

Reliable

The face alignment tool automatically adjusts face position and size so that it fits the frame properly. Produce high quality compliant ID photos from the ID printing experts!
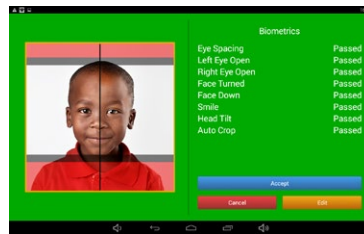

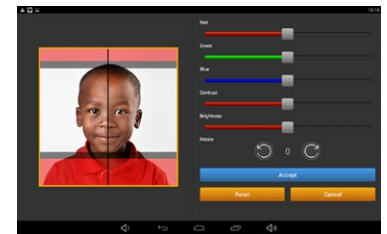

Let the software do it all!

Choose from a vast selection of foreign and domestic passport and Visa output sizes.

The IDW500 software creates a gallery of the past six captured images. This allows for easy reprints or changing the template without taking another picture.

The 8 built-in biometric checks automatically adjust head size, position, tilt, crop, and more to ensure the image meets chosen requirements.

You can manually adjust color, brightness, contrast, and more to ensure the highest quality photo. The image can also be transferred to a customer's USB.

Specifications

Console
