- DNP's ID software verifies every image before printing.
- Designed for foreign and domestic passport, Visa and specialty ID requirements.
- 3-year Advance Exchange (AE)*
Warranty included with the printer!

Small Footprint

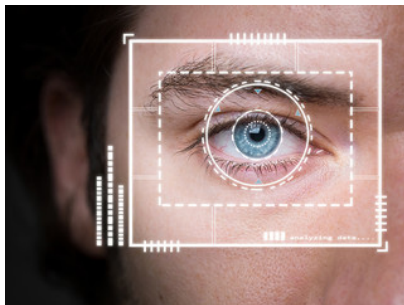

Light & Compact ID Photo Print System

High Profits, Big Demand

ID photo printing is one of the most profitable services a photo business can offer. Competitive media pricing allows for higher revenue potential, meaning more profit for your business.

Over 24 Million Passports Issued in 2023**

Shoot and transfer images automatically. Choose the images to process right on the IDW console. Fully automatic shoot-to-print settings are configurable.

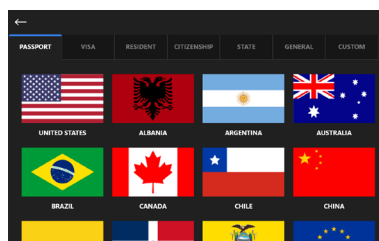

Image Verification

The IDW520 checks every image processed against 6 key image metrics, so each Passport or Visa photo meets domestic and foreign requirements, thus eliminating rejections and unhappy customers.

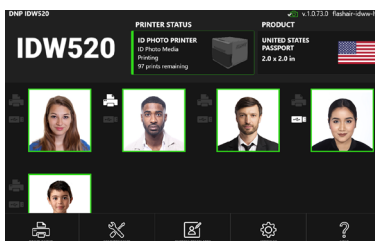

You're in control when you want to be ... with full image editing to get the right output for difficult subjects like infants and toddlers

Let our new software do it all

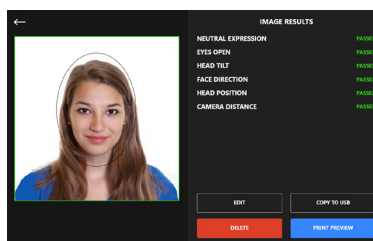

Image Auto-Transfer makes wireless image transfer seamless and easy to use.

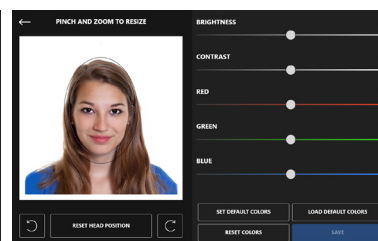

Choose from a vast selection of foreign and domestic Passport and Visa output sizes, and full page Portrait prints.

The IDW520 software creates a gallery of the past 16 captured images. This allows for easy reprints or changing the template without taking another picture.

The 6 built-in image checks automatically adjust head size, position, tilt, crop, and more to ensure the image meets chosen requirements.

You can manually adjust color, brightness, contrast, and more to ensure the highest quality photo. The image file can also be exported to a USB storage.

Specifications

Console

Screen Size/Resolution	6.8" Diagonal Visible / 1200x800
Touchscreen	5-point capacitive multi-touch
Radio Frequency / Antenna	Wireless LAN 2.4Ghz: 802.11 b/g/n / 4.5" 2 dBi gain
